Color Up Therapeutics
2191 S. Broadway
Denver, CO 80210

To Whom It May Concern:

Color Up Therapeutics, the manufacturer of **Color Up Full Spectrum CBD Sublingual, Color Up Pure CBD Sublingual, Color Up Full Spectrum Capsules and Color Up Pure CBD Capsules**, cannabis-derived products, has submitted written information to the Public Health Investigations Division of the Denver Department of Public Health and Environment ("the Department") regarding their manufacturing processes. The production process for the concentrate and the above noted product have been evaluated for shelf-stability and control for growth of *Clostridium botulinum* spores.

The CBD concentrate ingredient used in the above noted product is manufactured at Mile High Labs which has been deemed as shelf stable by the Department. Color Up Therapeutics and Mile High Labs are both regulated by the Colorado Department of Public Health and Environment as wholesale food manufacturers and therefore are considered approved sources in Denver. The Department also conducted evaluation of the end product.

Color Up Therapeutics is approved to store the above noted products as non-potentially hazardous foods not requiring time or temperature control for products manufactured after 8/20/2019. Any changes to the production process, ingredients, or ingredient sources for the above noted products may result in a change to this approval. Furthermore, approval may be rescinded, or conditions adjusted at any time if new information becomes available about risks of the product. Any changes to the process for making the concentrate or the above noted products must be submitted in writing and approved in advance by the Department for continued approval to treat final products as non-potentially hazardous foods.

The Department recommends maintaining this approval available upon request and providing a copy to Denver retail outlets where the product is sold. A second copy will be maintained on file at the Department.

Kind regards,

Danica Lee
Division Director
